What's New In?

RssReader is an application designed to help you read RSS and Atom news feeds. RssReader collects news in the background at user configurable intervals and warn with a little popup in the system tray that there is a new message arrived. You can click the news headline to see a short description of the news and click or open the original news web page in an RssReader browser or default browser window. RSS (Really Simple Syndication) is a format for syndicating news. Installing from disk: 1. Copy the rssreader.dll, rssreader.rc and rssreader.def from the release folder to your RssReader folder (if it is not the default path see the FAQ) 2. Click on Run and start RssReader. Installing from the Internet: 1. Download the rssreader.dll, rssreader.rc and rssreader.def from the release folder 2. Right click the RssReader.exe icon on your desktop and click Run as Administrator 3. Click OK when the shortcut windows appears Important note: This project uses a new API that will require.NET 2.0 and higher to run. This version is for the.NET 2.0 framework and

should not be used for newer versions. If you use this version for other frameworks please follow the documentation on how to make it compatible for other framework versions. The compiled output of this application is saved in the release folder. You can use any RSS feed source, that can be crawled by the.NET 2.0 RSS and Atom Syndication libraries. You can have some fun with this project by using its parser. Currently some of the main RSS types are parsed. * Atom * RSS 2.0 * RSS 1.0 * RSS 0.91 * ATOM 0.3 * ATOM 1.0 If you want to use your own RSS feed, you can just add it to the rsslist.xml file. This file is saved in the release folder. If you want to make a standalone download version, you can add some comments to the rsslist.xml file, so that this file can be included in the installation. This file is included to help you setup a standalone version of the application. Support for this project can be found in the rssreaderforum. You can post or download your RSS feed source here. I hope that you enjoy using RssReader. RssReader Homepage Licence

System Requirements For RssReader:
