I want to have variable names in HTML output. For example the following var a=1; var b=2; var c=3; will look like a =

1 b = 2 c = 3 Is this possible?
If so how? A: var a,b,c; for(var i = 0; i < a; i++); } for(var i = 0; i < b; i++); } for(var i = 0; i < c; i++); } This should output something like: 1 2 3

The invention relates to a method for x-ray imaging of the respiratory system of a patient, especially a patient in the supine position, wherein x-rays are generated by means of an x-ray source at a source-detector distance of 90 cm and the image is recorded in steps during a respiratory cycle of the patient. Patients who

receive intensive care may be provided with a respirator which is configured to supply and remove air and fluids to the patient. With an increasingly older patient population more intensive care is needed. It is common practice for respiratory therapy to demonstrate the effects of therapy, and any abnormalities in the ventilation, perfusion and/or gas exchange of the respiratory system, in order to obtain relevant indications for therapeutic measures. In many

applications the patient is ventilated while the procedure is being performed. For this purpose, high-resolution x-ray imaging is used to obtain high-contrast images of the lungs, the chest and the mediastinum. Different conventional techniques for imaging are known for examples by S. Zollinger et al. in their article titled “Mediastinal X e79caf774b
